Log Files

SCHS is a scanner that saves the information you give him and file signatures and their properties in a database – **SA-PP**. <https://sa-pp.com/> - but any personal data. follows a standard procedure of saving a log in a database that contain all the information provided by the user:

- Nickname,

- Staff member selected
- Date and time stamp from the beginning of the scan and game related folders properties
- Matched files and path properties
- Windows machine unique ID (MachineGuid)

The scanner elects the files by having the same size of a hack and after this, it compares. Having the same signature of any hack file stored in the database, the information is saved in form of encrypted text to be accessed by the selected staff member after log-in to a second application, **SCHSAdmin**. The information collected can include folder names that maybe composing the elected file paths.
